| **Thursday**<br>February 19, 2026<br>*Date* | On the first day, I modified the Attendance Module, specifically adding Leave functions. The goal was to streamline the process of recording and managing employee leave requests. I made sure to integrate the new leave feature with existing attendance records, which was essential for precise tracking. Later, I demonstrated Payroll, Leave, and Attendance modules to both the team and | I learned how the leave feature works together with attendance and payroll to make sure salary computation is correct. I also better understood how the system flows and how each module is connected and works with one another. I also learn how important the feedback and suggestions of the others to better improve the module and system. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:59 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:03 PM |

| **Saturday**<br><br>February 21, 2026<br>*Date* | I made a new module called Student Scholarship List for students who do not have a scholarship yet. This module helps the system keep track of students who still need scholarships and makes it easier to manage them. While I was building it, I ran into some errors like 500, 404, and 400. I fixed these problems by checking the backend, looking at the API links, and correcting the server logic and validation. | I learned that correct routing and validation are very important to stop system errors. Fixing 500, 404, and 400 errors helped me understand how the frontend and backend work together. I also got better at finding and fixing problems by carefully checking API paths, request types, and server answers. This experience helped me improve my skills in building system modules and solving problems when things go wrong.<br> | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:05 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:36 PM |

| DAY/DATE | DESCRIPTION OF ACTIVITIES | INSIGHTS GAINED | SESSION | TIME |
|---|---|---|---|---|
| **Monday**<br>February 23, 2026<br>*Date* | After making the Student Scholarship List module, I was tasked to create a Payment Exporting Module that lets the system export all students' payment information. I also made a COR (Certificate of Registration) Exporting Module to export students' CORs by program. While building these modules, I used tools like ExcelJS to create Excel files and jsPDF to make PDF documents. These tools helped me generate the files quickly and made the modules easier to use.<br> | From this task, I learned how to create reports that can be downloaded using external tools. I also learned how to arrange and format data properly for Excel and PDF files. I understood that organizing database queries well is important to make sure the reports are correct and neat. This experience helped me get better at handling data and making reports in a real system. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:46 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:24 PM |
| | | | **No. of Hrs Rendered** | 8 hrs |
| | | | | |
| **Tuesday**<br>February 24, 2026<br>*Date* | While working on the Payment Exporting and COR Exporting modules, I also fixed some errors in the Data Migration Panel during data transfer. I checked how the migration worked, made sure the data was correct, and solved the problems that caused the errors. After fixing these issues, I was able to complete the migration successfully. | I learned that data migration needs careful checking and testing to avoid system errors. Fixing bugs during migration showed me how important it is to keep data consistent and handle errors correctly. This experience also helped me get better at finding and fixing problems and taught me how important it is to make sure all transferred data is correct and complete. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:43 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:00 PM |
| | | | **No. of Hrs Rendered** | 8 hrs |

| | | | | |
|---|---|---|---|---|
| | | | | |
| | | | | |
| **Wednesday**<br><br>February 25, 2026<br>*Date* | I updated the TOSF Module to include all types of fees. I also added a new feature for scholarship management, which lets the system add new scholarship types, set discounts, and specify how much each scholarship covers. I used basic CRUD operations on the frontend and connected them to the backend APIs to make sure the data is saved, updated, and retrieved correctly.<br>  | I learned how to expand an existing module to handle more tasks while keeping the data correct. Working with CRUD operations and API connections helped me understand how the frontend and backend work together. I also gained experience in making features that let scholarships be managed easily, which makes the system more flexible and user-friendly. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT:<br><br>**No. of Hrs Rendered** | IN: 7:40 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:31 PM<br><br>8 hrs |
| | | | | |
| **Thursday**<br><br>February 26, 2026<br>*Date* | Together with my team, I worked on updating the Payroll Module by adding functions for leave deductions in the attendance system. We also practiced using MySQL Workbench and its Community Server to improve how we manage the database.<br>  | I learned how leave deductions can work together with attendance tracking in a payroll system. I also got hands-on experience with MySQL Workbench and learned how to connect and manage databases, which improved my practical database skills. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT:<br><br>**No. of Hrs Rendered** | IN: 7:03 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:07 PM<br><br>8 hrs |

| **Friday**<br><br>____ _____<br>*Date* | | | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT:<br><br>**No. of Hrs Rendered** | |
| | | | | |
| **Saturday**<br><br>February 28, 2026<br>*Date* | I attended the On-the-Job Training (OJT) orientation held by the company. The orientation gave us important information and guidance about the training. During the session, we were introduced to the company and its structure. We also learned about our tasks, responsibilities, | I learned more about how the company works and what is expected of me during my On-the-Job Training. The orientation helped me understand my tasks, responsibilities, schedule, and rules. It also gave me a clear idea of how to navigate the organization and who to ask for help when needed. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT:<br><br>**No. of Hrs Rendered** | IN: 1:45: PM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 6:03 PM<br><br>4 hrs |

| DAY/DATE | DESCRIPTION OF ACTIVITIES | INSIGHTS GAINED | SESSION | TIME |
|---|---|---|---|---|
| **Monday**<br><br>March 2, 2026<br>*Date* | On this day, I started fixing and improving parts of the current system. I worked on updating the HRIS Audit Logs to make sure all records are tracked correctly. I also made changes to the Admission and Enrollment System, especially the Slot Monitoring, Pre-Enrollment, and Student Enrollment features, to make them work properly and more smoothly.<br> | I learned that keeping correct and normalize system records such as user actions is very important, especially in audit logs. I also understood better how the admission and enrollment process works in the system. Fixing and updating these features helped me improve my problem-solving skills and understand the system flow more clearly. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:48 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 6:17 PM |
| | | | **No. of Hrs Rendered** | 8 hrs |
| | | | | |
| **Tuesday**<br><br>March 3, 2026<br>*Date* | On this day, I started creating new modules for the payment system. I worked on a Receipt module and a Matriculation Payment module. This included the Receipt Counter Assignment, which gives each cashier a receipt ID, the Receipt and Transaction module for matriculation, and the Transaction Logs module. I was able to finish the Receipt Counter Assignment module on this day.<br> | I learned how to implement "Scoped Counters per User," which assigns a unique receipt ID to each cashier so that no two employees use the same ID. I also learned how to keep receipt numbers in order and automatically update them after each transaction. This taught me how to design features that improve accuracy and organization in a payment system. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:45 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:53 PM |

# College of Computing Studies
## Computer Science Department

| | | | | |
|---|---|---|---|---|
| **Wednesday**<br><br>March 4, 2026<br>*Date* | I continued working on the Receipt and Transaction Module for Matriculation and the Transaction Logs. I added several features, including a breakdown of each student's payment displayed in a graph, the ability to print receipts, saving transaction logs, tracking balances, and recording how much each student pays.<br> | I learned how to add features that make the payment system better, like showing payment breakdowns in graphs, printing receipts, and saving transaction logs. I also got hands-on experience with SQL queries to store and get data correctly, using if-else conditions to handle different payment situations, and calculating balances and payments. This work helped me improve my coding, problem-solving, and organizing data clearly in the system. | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:47 AM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 6:24 PM |

| **Thursday**<br><br>March 5, 2026<br>*Date* | I attended a follow-up meeting with my supervisors and team members, along with the president and HR personnel, to review the Leave modules and the updated payroll processing module. During the meeting, we carefully checked if the DTRs were showing data correctly and made sure the watermarks for Leave, Suspensions, and Holidays were displayed properly. We also discussed how some modules could be improved to make them easier to use and manage. In addition, we shared ideas and suggestions to address small issues in the system and make it more practical for daily use. | From this meeting, I understood how important it is for the system to give accurate and clear information that matches how the organization works. I also learned that talking and sharing ideas with the team helps find easy and practical ways to improve the system. The meeting showed me how teamwork and careful review can make the system more reliable and easier to use.<br> | **Morning**<br>IN:<br>OUT:<br>**Afternoon**<br>IN:<br>OUT: | IN: 7:32 PM<br>OUT: 12:00 PM<br><br>IN: 1:00 PM<br>OUT: 5:00 PM |
