WEEKLY JOURNAL EXPERIENCES

For the Month of **MARCH**

NAME OF INTERN	ARDEN B. MECASIO	**COOPERATING AGENCY**
COURSE / SECTION	BS INFORMATION TECHNOLOGY 4B	EULOGIO "AMANG" RODRIGUEZ INSTITUTE OF SCIENCE AND TECHNOLOGY (EARIST)
CONTACT NO.	09561692738	
DEPARTMENT/ OFFICE ASSIGNED	MANAGEMENT INFORMATION SYSTEM (MIS)	**COOPERATING AGENCY ADDRESS**
DEPARTMENT/ OFFICE CONTACT NO.	136	NAGTAHAN ST. SAMPALOC, MANILA
DEPARTMENT/ OFFICE EMAIL ADDRESS	mis.suppport@earist.edu.ph	

DAY/DATE	DESCRIPTION OF ACTIVITIES	INSIGHTS GAINED	SESSION	TIME
Monday March 09, 2026 *Date*	On March 9, 2026, I fixed different errors and bugs found in our latest code. I worked on features like course tagging for college and searching C.O.R for college. I also improved email sending in the Qualifying Exam Scoring module, updated slot monitoring, and enhanced the matriculation user experience. 	I learned that fixing bugs helps improve system performance and user satisfaction. I understood the importance of testing each feature carefully before deployment. I also realized that small UI changes can make the system easier to use.	**Morning** IN: OUT: **Afternoon** IN: OUT: **No. of Hrs Rendered**	IN: 7:56 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:00 PM 9 hours
Tuesday March 10, 2026 *Date*	On March 10, 2026, I worked on system auditing for the Enrollment and Admissions System. I focused on improving error handling in different parts of the system. I also fixed errors and bugs that appeared during the auditing process. 	I learned that system auditing helps find hidden errors in the system. I understood the importance of proper error handling to avoid system crashes. I also realized that fixing issues early can prevent bigger problems later. I learned to check system logs to better understand where errors come from. I also saw that clear error messages make debugging faster and easier.	**Morning** IN: OUT: **Afternoon** IN: OUT: **No. of Hrs Rendered**	IN: 7:48 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:16 PM 9 hours

Wednesday March 11, 2026 *Date*	On March 11, 2026, I continued fixing errors and bugs found during the system auditing. I worked on issues like email sending errors and cases where the person was not found. I also checked other parts of the system to ensure everything was working properly. 	I learned that repeated testing is important to fully fix system issues. I understood that small errors like missing data can cause bigger problems in the system. I also realized that careful checking helps improve overall system reliability.	**Morning** IN: OUT: **Afternoon** IN: OUT:	 IN: 7:40 AM OUT: 12:00 PM IN: 1:00 PM OUT: 7:00 PM
			No. of Hrs Rendered	10 hours
Thursday March 12, 2026 *Date*	On March 12, 2026, I implemented audit logs in the login and register modules. This was applied to applicants, employees, and students. The goal was to track user actions in the system. I ensured that each action was properly recorded in the database. I also tested the logs to make sure they were working correctly. 	I learned that audit logs help track user activity and system changes. I understood that this improves system security and monitoring. I also realized that logs are useful for debugging and reviewing issues. I learned that accurate logs make it easier to trace problems. I also saw that logs can support system accountability.	**Morning** IN: OUT: **Afternoon** IN: OUT:	 IN: 7:50 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:14 PM
			No. of Hrs Rendered	9 hours
Friday ____ _____ *Date*			**Morning** IN: OUT: **Afternoon** IN: OUT:	
			No. of Hrs Rendered	
			TOTAL TIME EARNED FOR THE WEEK:	**37 hours**

DAY/DATE	DESCRIPTION OF ACTIVITIES	INSIGHTS GAINED	SESSION	TIME
Monday March 16, 2026 *Date*	On March 16, 2026, I audited the system again focusing on faculty and student modules. I checked for errors and bugs in these modules. I fixed the issues as soon as I found them. I reviewed different functions to ensure they were working correctly. I also made sure that no new errors appeared after fixing. 	I learned that regular auditing keeps the system stable and updated. I understood that checking specific modules helps find more detailed issues. I also realized that quick fixes reduce future problems. I learned that repeated checking improves system quality. I also saw that testing after fixing is very important.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:44 AM OUT: 12:00 PM IN: 1:00 PM OUT: 7:02 PM
			No. of Hrs Rendered	10 hours
Tuesday March 17, 2026 *Date*	On March 17, 2026, I helped my group member fix errors and bugs in his module. I also connected the modules I fixed to his module. This helped improve the flow of the system. I reviewed the integration to ensure smooth data flow. I also tested the connected modules for errors. 	I learned that teamwork is important in system development. I understood that connecting modules must be done carefully to avoid errors. I also realized that clear communication helps solve problems faster. I learned that integration testing is needed after combining modules. I also saw that helping others improves overall project progress.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:55 AM OUT: 12:00 PM IN: 1:00 PM OUT: 7:00 PM

Wednesday March 18, 2026 *Date*	On March 18, 2026, I fixed modules related to medical features. This includes medical certificate and medical list functions. I also fixed the sidebar links and button navigation. I corrected the function for fetching student data. I also ensured that all links were working properly. 	I learned that data fetching must be accurate to avoid system errors. I understood that proper navigation improves user experience. I also realized that fixing small UI issues helps users use the system easily. I learned that broken links can confuse users. I also saw that clear structure makes the system easier to use.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:52 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:02 PM
			No. of Hrs Rendered	9 hours
Thursday March 19, 2026 *Date*	On March 19, 2026, I updated the student numbering function. It now turns off applicant accounts once they are officially enrolled. I also cleaned and optimized the server file and reduced 4000 lines of code. I removed unused and repeated code. I also organized the file for better readability. 	I learned that automation helps manage user accounts better. I understood that optimizing code improves system performance. I also realized that removing unused code makes the system cleaner and easier to manage. I learned that clean code is easier to maintain. I also saw that organizing code helps future development.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:19 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:00 PM

DAY/DATE	DESCRIPTION OF ACTIVITIES	INSIGHTS GAINED	SESSION	TIME
Monday March 23, 2026 *Date*	On March 23, 2026, I added functions and restrictions for inserting and updating data while my group member was encoding. I updated the POST API in the course module. I added validation to prevent duplicate course data from being inserted. I also tested the restrictions to ensure they were working properly. I reviewed existing data to avoid conflicts. 	I learned that data validation is important to keep the database clean. I understood that duplicate data can cause confusion and errors in the system. I also realized that adding restrictions improves data accuracy. I learned that backend validation is as important as frontend validation. I also saw that proper testing prevents future issues.	**Morning** IN: OUT: **Afternoon** IN: OUT: **No. of Hrs Rendered**	IN: 7:22 AM OUT: 12:00 PM IN: 1:00 PM OUT: 7:27 PM 10 hours
Tuesday March 24, 2026 *Date*	On March 24, 2026, I created a new module CourseTaggingForSummer. This module is used to tag students who are enrolling in summer. I also updated the requirements logic in all roles and modules to be dynamic. I removed static and hardcoded values from the system. I tested the module to ensure it worked correctly 	I learned that dynamic logic makes the system more flexible. I understood that hardcoded values limit system scalability. I also realized that reusable logic improves development speed. I learned that modules should be designed for future changes. I also saw that flexibility is important in large systems.	**Morning** IN: OUT: **Afternoon** IN: OUT: **No. of Hrs Rendered**	IN: 7:43 AM OUT: 12:00 PM IN: 1:00 PM OUT: 7:00 PM 10 hours

Wednesday March 25, 2026 *Date*	On March 25, 2026, I updated the function in the register API for generating applicant numbers. I added a simple queue function to improve the process. I also audited the system again after adding new updates. I checked if all functions were working without errors. I ensured that no new bugs appeared. I reviewed the output to confirm the applicant numbers were correct. I also tested multiple entries to ensure the queue works properly. 	I learned that generating unique numbers requires proper logic. I understood that queue systems help manage order and avoid duplication. I also realized that testing after updates is very important. I learned that small features can affect the whole system. I also saw that auditing ensures system stability. I learned that clear logic makes the system more reliable. I also realized that careful planning helps avoid future errors.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:43 AM OUT: 12:00 PM IN: 1:00 PM OUT: 6:30 PM
			No. of Hrs Rendered	9 hours
Thursday March 26, 2026 *Date*	On March 26, 2026, I updated the database on another computer after confirming no errors were present. I transferred the latest data to ensure consistency. I also updated the system to the latest source code. I checked if the system runs properly on the new setup. I verified that all features were working correctly. 	I learned that system updates must be done carefully to avoid data loss. I understood that syncing systems across devices is important. I also realized that final checking ensures system readiness. I learned that deployment requires careful planning. I also saw that testing in different environments is important.	**Morning** IN: OUT: **Afternoon** IN: OUT:	IN: 7:32 PM OUT: 12:00 PM IN: 1:00 PM OUT: 6:00 PM
			No. of Hrs Rendered	9 hours
